

ЗАДАНИЕ К УРОКУ

Задания предназначены для самоконтроля, отправлять на проверку учителю не надо.

1. 10 класс
2. Английский язык
3. Тропический лес
4. Северинова Елена Юрьевна

1. Answer the questions. You will have 20 seconds to answer each question:

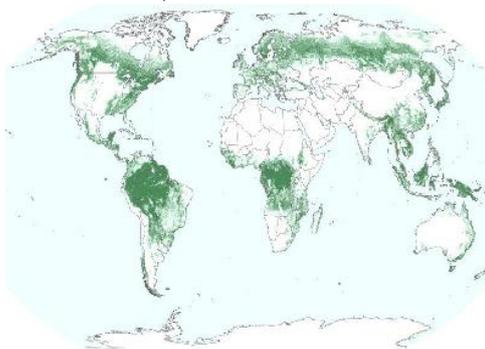

1. What are tropical rainforests?
2. Why are they important?
3. What grows there?
4. Why are they in danger?
5. What can we do to save them?

2. Copy the table and check if you know the answer.

	I know	I have learnt
1. What are tropical rainforests?		
2. Why are they important?		
3. What grows there?		
4. Why are they in danger?		
5. What can we do to save them?		

3. Read the following paragraph and choose the map showing where rainforests are:

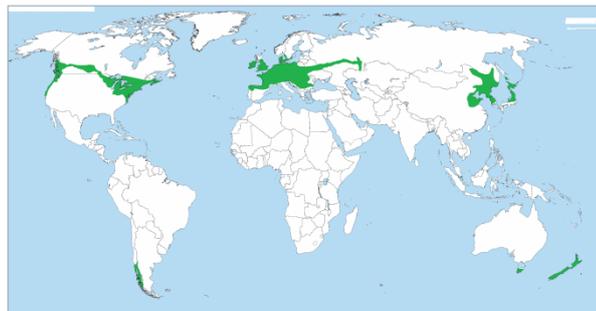

Tropical rainforests grow in the hot, wet, humid places near the Equator. The plants and trees in the rainforest grow to different heights. The forest can be divided into four layers: the forest floor, the understorey, the canopy and the emergent (layer of larger trees which stick out above all the rest).

Map 1

Map 2

Map 3

4. Read again and match layers with their names:

Tropical rainforests grow in the hot, wet, humid places near the Equator. The plants and trees in the rainforest grow to different heights. The forest can be divided into four layers: the forest floor, the understorey, the canopy and the emergent (layer of larger trees which stick out above all the rest).

5. Read the following paragraph and write out what rainforests do:

They are important for various reasons. Firstly, they clean and renew the Earth's air supply by absorbing carbon dioxide and producing oxygen. Secondly, they provide a home to thousands of animal and plant species.

6. Read the following paragraph and write out numbers of pictures that represent plants which are not mentioned in the text:

7. Read the following paragraph and write out three ways to lessen deforestation.

There are lots of things that we can do to help protect the rainforests. Join an organisation which tries to save the rainforests, like Greenpeace. Write letters to politicians in countries where there are rainforests, asking them to stop allowing companies to cut down the trees. Don't buy furniture which is produced from rainforest wood.

8. Read the text again and match paragraphs and titles

1. Tropical rainforests grow in the hot, wet, humid places near the Equator. The plants and trees in the rainforest grow to different heights. The forest can be divided into four layers: the forest floor, the understorey, the canopy and the emergent (layer of larger trees which stick out above all the rest).

2. They are important for various reasons. Firstly, they clean and renew the Earth's air supply by absorbing carbon dioxide and producing oxygen. Secondly, they provide a home to thousands of animal and plant species.

3. People are destroying the rainforests at a rate of 115 square miles a day. The trees are cut down and used as building material or fuel. The land on which these forests grow is being used for homes and factories and roads.

4. South American rainforests are the home of the wild cocoa plant, from which chocolate is made. The medicines quinine and aspirin come from tree bark and cough mixture is from tree resin, both found in rainforests. Some other important products that come from rainforest plants are mahogany wood, rattan, bananas, paprika, pepper and coffee.

5. There are lots of things that we can do to help protect the rainforests. Join an organisation which tries to save the rainforests, like Greenpeace. Write letters to politicians in countries where there are rainforests, asking them to stop allowing companies to cut down the trees. Don't buy furniture which is produced from rainforest wood.

9. Now try to answer more questions. You will hear a question and you will have 10 seconds to answer it. Then you will hear the correct answer.

10. Задание для тех, кто собирается сдавать ЕГЭ по английскому языку.

Прочитай текст. Преобразуй слова в скобках, обозначенные номерами 1-8 так, чтобы они грамматически и лексически соответствовали содержанию текста. Используй элементы im-, -ing, -less, over-, under-.

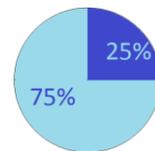

Tundra ecosystems are _____ (1. – tree) regions found in the Arctic and on the tops of mountains, where the climate is cold and windy, and rainfall is little. Tundras are covered with snow for much of the year.

Mountain goats, sheep, marmots, and birds live in mountain / alpine tundra and feed on the _____ (2. – foot) plants and insects. The Arctic tundra, with average temperature -34 to -6 C,

supports a variety of animal species, _____ (3. – include) Arctic foxes, polar bears, gray wolves, caribou, snow geese, and musk oxen. The summer growing season is just 50 to 60 days, when the sun shines up to 24 hours a day including _____ (4. – night). The few species of plants and animals that live in the _____ (5. – possible) conditions of the tundra are essentially clinging to life.

11. Try to answer the following questions. If you can't, you can use the Internet.

1. You can't find rainforests only on one continent. What?
2. This is the most famous rainforest area. What continent?
3. Tropical rainforests have been called the "world's largest pharmacy", because a lot of natural medicines have been discovered there. Which part of the diagram shows this part?

4. What bear can't you meet in the Great Bear Rainforest?

Cave bear Kermode bear Grizzly bear

5. What picture shows something that has the same name as a layer of the tropical rainforest?
